## THE PROBLEM — THREE FAILURES THAT HOLD AUSTRALIA BACK

### NO INTERIOR · NO INDUSTRY · NO HOUSING

The inland is empty because it has never had infrastructure. Power costs \$100-150/MWh — industry is leaving. Sydney costs \$1.4M median — young Australians locked out. All three failures

### WATER WRONG PLACE · GRID FRAGILE · NO

30,000GL monsoon water flows into the sea unused every year. The grid has no east-west connection — when one node fails there is no backup. No transcontinental freight rail. No

### RESOURCES SOLD · NOTHING BUILT · NO SW

Iron ore, gas, lithium — exported raw, processed overseas, profits offshore. No sovereign wealth fund. No manufacturing base. Asia needs our energy and compute and we are selling neither.

## THE MMP SOLUTION

### SIX CORRIDORS — THE SKELETON

SBC#1 Brisbane–Perth 4,000km · SBC#2 Darwin–Port Augusta 2,400km · SBC#3 Gulf–Adelaide 2,500km · SBC#4 Port Hedland–Mackay 3,200km · SBC#5 Broome–Esperance 1,800km · SBC#6 Mt Isa–Perth 2,700km. Seven services one pylon: HVDC, fibre, water, gas, highway, freight rail, Maglev.

### POWER AT 6c/kWh — INDUSTRY SAVED

1,000GW desert solar via HVDC to every capital and industrial zone. Industrial power from \$100-150/MWh falls to 6c/kWh delivered. Boyne Island aluminium smelter: no subsidy needed — most profitable on earth. Coal closure follows as market outcome. Net zero without a mandate.

### HOUSING AFFORDABLE — 181 TOWNS

\$150/week rent. \$150K-\$250K rent-to-buy. Land near zero on government easement. All seven corridor services from day one. A corridor family is \$70,000/yr better off than Sydney. 181 towns at full build. First near Roma QLD — Year 2. Coastal land prices fall as the monopoly on location ends.

### WATER SOUTH · PUMP HYDRO · 30GL

Three capture corridors intercept northern monsoon runoff. MacDonnell Ranges gorge storage — Ormiston Pound key site. 30GL delivered south per year. Gravity distribution five directions. 2.2-yr drought reserve. 6.7M ha new farmland. Pump hydro from elevation: 100GWh+ dispatchable overnight. Murray-Darling wars ended.

### MANUFACTURING RENAISSANCE

Green aluminium: Boyne, Tomago, Portland — saved. Green steel: Whyalla hydrogen. Australian lithium → Australian batteries. Solar panels along corridor. HVDC cable domestic at \$500K/km. Hydrogen export \$1.50-2.00/kg. Green industrial economy at maturity: \$68-135B/yr.

### MAGLEV · RAIL · END OF AIR TRAVEL

Maglev 500km/h on every corridor easement. Perth–Sydney 6.5hrs · Brisbane–Melbourne 3.5hrs · Darwin–Adelaide 5hrs. Domestic aviation redundant. Freight rail: first transcontinental spine in Australian history. City centre to city centre. No airports. No queues.

### EAST-WEST GRID — NET ZERO

WA grid connected to eastern states for the first time. Time-zone arbitrage: solar peaks west while east goes dark — free dispatchable power from geography. 400GWh battery storage Phase 1. Australia reaches net zero electricity before end of first SBC build phase.

### ASIA LINK · AI DATA · SPACEPORT

Asia Link undersea: HVDC + hydrogen + fibre + compute. \$57B/yr at maturity. AI data centres: 6c/kWh + corridor water + fibre — \$8-15B/yr. Australian data stays in Australia. Spaceport: 20-30° south, sovereign methane propulsion, SpaceX anchor tenant, sovereign launch capability.

### CHEAPER EVERYTHING

At 6c/kWh: steel down 30-40% · aluminium down 60%+ · building materials cheaper · corridor food at scale · biofuel + hydrogen + domestic crude. The SBC is the most powerful cost-of-living intervention in Australian history. Cheap energy means cheap everything.

### DEFENCE — SOVEREIGN MOBILITY

SBC highway to ADF spec: handles tanks and armoured vehicles. Corridor townships dual-use civilian/ADF forward bases. Engineer Corps — 20,000 soldier-tradies — builds in peacetime, defends in war. Perth to Darwin overland for the first time. Interior vulnerability closed.

### HEALING TOWNS · INDIGENOUS CONNECTION

20-30 dedicated healing towns nationally · 500 beds each · farm, purpose, community — not institutions. Hospice: dignity standard. Community Healing Hub every town. Every remote Indigenous community: power, water, road, fibre as first-order deliverable. The gap closes when infrastructure arrives.

### SOVEREIGN WEALTH FUND — FROM THE SUN

REL \$40-80B/yr + 30% SBC corridor revenues locked permanently. SWF reaches Norwegian scale within two decades. Funds: tax rate falling to 20% · Citizen Dividend Year 5 \$400-600/person tax-free · future infrastructure without borrowing · intergenerational wealth for every Australian.

**CURRENT FAILURE vs THE MMP FIX — THE CHOICE**

CURRENT — THE FAILURE	MMP — THE FIX
No sealed road Brisbane to Perth. No east-west rail. Interior unconnected.	<b>Six SBC corridors — 18,210km — seven services on one pylon. Built once, used forever.</b>
Industrial power \$100-150/MWh — aluminium smelters closing, manufacturing leaving.	<b>6c/kWh delivered corridor power. Boyne Island saved. Manufacturing globally competitive.</b>
Sydney median \$1.4M. Rents up 40%. Young Australians locked out of ownership.	<b>181 corridor towns. \$150/week rent. \$150K-\$250K rent-to-buy. \$70K/yr better off than Sydney.</b>
30,000GL monsoon water flows into sea unused. Murray-Darling dying from overallocation.	<b>30GL south per year. MacDonnell storage. 100GWh+ pump hydro. 6.7M ha new farmland.</b>
Iron ore, lithium, bauxite exported raw. No manufacturing base. No sovereign economy.	<b>Green aluminium, steel, batteries, solar panels, HVDC cable — made in Australia.</b>
No transcontinental rail. Sydney-Melbourne busiest air route on earth. Duopoly airfares.	<b>Maglev 500km/h — Perth-Sydney 6.5hrs. Freight rail transcontinental. No airports needed.</b>
WA grid isolated. Eastern grid fragile. Coal dependent. Net zero impossible on current grid.	<b>East-west grid connected. 400GWh storage. Net zero before end of first SBC build phase.</b>
Asia needs energy and compute. We have sun, land, fibre. We sell them nothing.	<b>Asia Link \$57B/yr. AI data centres \$8-15B/yr. Spaceport sovereign launch capability.</b>
Steel, aluminium, food, fuel, building materials — all overpriced due to high energy cost.	<b>Cheap corridor power: steel -30-40%, aluminium -60%+, food at scale. Cheap energy = cheap everything.</b>
\$0 sovereign wealth fund. 30 years of resources sold. Nothing kept for the next generation.	<b>REL + SBC revenues → SWF. Norwegian scale in two decades. Citizen Dividend from Year 5.</b>

*"The inland is not empty because it is undesirable. It is empty because it has never had infrastructure. The SBC fixes that — permanently." — MMP Federal Platform*
